Tuition and Required Costs

Item	Amount	Notes
Annual tuition	\$4,500	Single comprehensive tuition for the full-time program.
Required application, registration, placement, technology, or materials fees	\$0	AIA does not charge separate required fees for the full-time program.
Required courses, curriculum, learning tools, and materials	Included	Includes AIA required courses, AIA LMS access, assigned learning tools, required materials, and school designated resources for the student plan.
Student and parent account tools	Included	Includes student accounts, email or web services, parent tools, and school web services when assigned.
School issued technology	Included	AIA generally assigns a managed laptop, tablet, or equivalent device matched to the student plan, unless another arrangement is made.

AIA charges a single comprehensive tuition rate for the full-time private school program. AIA does not charge required add-on fees for the full-time program.

AIA full-time tuition includes the required core courses, the student's selected exploratory elective course area, and any clubs, school activities, or designated courses that AIA includes as part of the full-time program. AIA may also offer separate standalone courses, mentorships, camps, or services outside the full-time program. These separate offerings are not required for full-time enrollment, are not part of included full-time tuition, and may be charged separately when selected by the family.

Personal Project Software Design Mentorship is a separate standalone offering unless AIA expressly includes it in a student's full-time course plan.

Refund Summary

Refund amounts depend on the official withdrawal date and, when school issued devices have been assigned, the return of all school issued devices by the return deadline.

Withdrawal timing	Refund if all school issued devices are returned by deadline	Refund if any school issued device is not returned by deadline
Before student specific setup begins	\$4,500	\$3,500
Early participation window	\$4,000	\$3,000
Midyear refund window, ending January 25, 2027	\$1,500	\$500
After January 25, 2027	No tuition refund	No tuition refund

For standard fall enrollment, student specific setup generally begins on August 1, 2026, unless AIA and the family have confirmed an earlier setup date in writing. Student specific setup means AIA has begun procuring, assigning, or licensing student accounts, curriculum access, school managed software, school web services, or school issued devices for the student.

The early participation window ends three weeks after class participation begins, or October 1, 2026, whichever comes first.

The reduced refund amount reflects a school property reserve tied to device return and reconciliation under the school device agreement. School issued devices must still be returned even when no tuition refund is available.

For Utah Fits All scholarship students, any tuition refund owed under this policy will be remitted directly to Odyssey for deposit back into the student's scholarship account. Refunds will not be paid directly to the parent or student.
